# QUICK SET RAZOR CUT

# ABSOLUTE POSITIONING

**Quick Set Systems are employed worldwide in a wide variety of web slitting applications. DIENES is proud to compliment the Shear and Crush Cutting Quick Set product line with a Razor Quick Set positioning system. All three slitting systems can be manufactured for O.E.M. custom fit stand alone or winder mounted designs.**

## **Quick Set: Razor**

- | Available with the cost effective PQAS 1/2 Mechanical Razor Knife holder design.
- | Also available with the industry standard PQAS 1/2 Pneumatic Razor knife holder to accommodate your application needs.
- | DIENES employs a stiff brush roller rather than a grooved steel roller to support the web during blade engagement.
- | The blade never contacts a damaging steel surface when setting slit widths.

## **PQAS 1/2 Mechanical Holder**

- | Allows blade replacement without holder removal.
- | Individual blade holder slides can be preloaded with new blades for common, quick, and safer exchange when needed.
- | A quick pin locking system allows placing the blade out of harm's way during thread up.

## **PQAS 1/2 Pneumatic Holder**

- | Provides remote engage/disengage operations for those applications without easy access.
